

ASME Robotics for Inspection and Maintenance Forum

June 26 & 27, 2018

PRCI's Technology
Development Center
Houston, Texas

CALL FOR PARTICIPATION

Present your case studies, participate on panels or demonstrate your solution for robotics inspection and maintenance at this new event from ASME.

ASME is excited to introduce the Robotics for Inspection and Maintenance Forum to be held in the Houston area. This 2-day forum brings together executives, managers, and engineers to learn, network, and share how new cutting-edge UAS/drones, robotics crawlers, and robotics submersibles technologies are transforming the inspection and maintenance landscape across multiple industries and applications.

What Topics Will Be Covered?

- ✓ Inspection and Maintenance Needs of End Users and Asset Owners
- ✓ Unmanned Aerial Systems (UAS) Inspection
- ✓ Robotics Inspection (ground and/or submersible)
- ✓ Confined Space Entrance
- ✓ Data Analytics, Management, and Workflow
- ✓ Robotic Maintenance
- ✓ Regulations, Standards, and Procedures
- ✓ Future Technologies for Robotics Inspection

Who Should Attend?

NDT Managers, Asset Managers, Engineers, Inspectors, Purchasing Managers, Outage Planners, Turnaround Planners, and Engineers in the Oil & Gas, Power Generation, and Pipeline markets who are focused on deploying or using new robotics technologies.

Experts from Robotics OEMs and Robotics Inspection Services companies to demonstrate the latest robotics inspection and robotics maintenance technologies and data analysis.
